

### Origin

We are proud to say that our **Trilliums** are propagated and grown here at the **Twelve Nunns Nursery**. Some of the original parent plants were wild-collected in North America and have been split to produce more plants or hand-pollinated to produce seeds which we have grown on.

### Planting position

Our plants are **at least 4 years old** and given the right situation and soil they should flower within one year of planting. **Trilliums** enjoy light shade with well-drained soil. The varieties we offer make good garden plants in the UK. We will send a planting advice sheet with your order.

### Season for despatch

We offer our full range of **Trilliums** for despatch in the dormant season which is from the **end of July to November**. They are sent as **freshly lifted, healthy rhizomes with live roots** in moist packing material so that you receive them in the best condition.

From December through to Spring we offer a limited range of our **Trilliums** as pot plants.
